Projects

- **CompileHub – Online Code Editor [Live]** March 2026 – May 2026
Developed a production-ready cloud-native online code editor using the MERN stack with secure multi-language code execution and Monaco Editor integration.
Implemented Docker-based sandboxing, JWT authentication, and scalable microservices deployment on AWS EKS using Kubernetes.
Automated CI/CD pipelines with GitHub Actions and Jenkins, and provisioned infrastructure using Terraform and Ansible.
Integrated Prometheus, Grafana, and AWS CloudWatch for real-time monitoring, logging, and observability.
Tech Stack: MERN Stack, Docker, Kubernetes (AWS EKS)
- **DevChat – Online Chat Application [Live]** January 2026 – March 2026
Containerized real-time chat application using Docker and implemented Socket.IO for low-latency communication (100+ users).
Automated CI/CD pipelines using GitHub Actions/Jenkins for seamless build and deployment.
Configured Nginx as a reverse proxy and built REST APIs with JWT-based authentication for secure access.
Managed MongoDB database and optimized performance for scalable real-time messaging.
Tech Stack: Docker, CI/CD, Nginx, MongoDB, MERN, Socket.IO
